Anti Psychiatry Exposing the Zersetzung Communist/Liberal Governmnet and Jewish Supremacy And The Mossad

All right so usually I make videos in a different room of mine but I'm painting that room right now. 12 the comments of some 1 or both because this person is the victim of gang stalking and I'm gonna give you a very descriptive definition and what the origin of it does isn't such because it's hard to get information on that there's a reason that it is hard to get information on that is because it is run by sheriff's department and actually funded by government agencies also do this 24/7 surveillance. It started out against the people they suspected terrorism or somebody's missing anything. Husband has killed the wife or something they can surveil them and and do different things but this is different because they're specifically psychologically targeting people to break them down and it actually brings a lot of people harm and some people commit suicide from that so I'm going to go through with this man that had a video on it he was really concerned I felt horrible for him is mine's going all directions and things so what I did is I left a comment. For him but I thought horrible for him so I'll be able to give him the proper information. Through this because for some people it's really hard I was looking. People that actually do it well by one person. So I'm gonna read what I had left for him. In the comments section. Gang stalking is coordinated by the sheriff's department the confidential informant told me he was an informant and I never knew that this was a friend of mine you felt bad because he told me that I was placed on the list it's only because they put me on the list to be a targeted individual 24/7 surveillance after I turned in a 30. The confidential informant my friend told me they're only goal is to trigger you to get you to commit suicide after they stop you and isolate you. They will break in your house and even do things double your bills etcetera to also target so they can also carry your finances they're doing things systematically make you waste money fixing replacing and spending on things you shouldn't have to because there's things. My friend at the maison lives many of the masons there were on the list is stalking harassing people also but the most people that the use of the confidential informants surveillance and other things for the. Police department. All bodies and different things like that but there's a difference between surveillance and harassment this they want you to know only one server ASEAN's like a logically come against you when they can get someone to finally commit suicide he said that they would throw parties and celebrate that like it was a big joke. It wasn't as bad for me because I knew what was going on since my friend has thankfully me off what was occurring and the sheriff's department to different individuals that we're doing this within one month of him telling me that I was on the list and that they were coming at me this phone and data from a diabetic thing he was 36 years old and his name was Josh. Coincidence. Your vehicle is the biggest single messed with they will do things that are check engine lights come on scratch the vehicles constantly break things that you just said repair put like small little cuts in the upholstery or on the - and little things you know cut with a razor like on your radio and plastic and things like that. One thing they love doing to my vehicle was cutting the steering wheel with nice I'm going to the store and come out and go to turn my wheel and then you have come up there is on the wheels they can let me know that the broken my car's messed with me and I guess well police reports on this isn't something weird is that document and stuff and I did that even knowing law enforcement and and their informants and different people involved in this program we're doing that but just to get a document but I knew it was going to work it is funny to me when I call in to document this and they they also killed my children I was a lucky ages and many other things broken in my house there's lots of things but I would call to file a report just get it documented and you know it would take like 6:00 hours for anyone to show up and it's not because I was waiting on the list so it takes just a super long time in the show only those like weapons like

a. Working to get a cop and you know it wouldn't go anywhere I think that at 1.. I can't remember if the animals killed or what but you know I want to show that there's a little bit of an escalation there I I think that's one of the kill the animals and stuff. I probably supports the new law enforcement. I'm going where global. Even when I put all the records they weren't even busy I just thought about that this last at least I would say at least 6 or 7 tires motorcycle tires do different things if I parked my car in the parking ramp and go downtown stuff and leave it there this is something I would come back and not only with my battery B. yeah they would actually kill a battery drain the battery but then they went on the battery cables from the battery to make it obvious that it wasn't just an accident you don't just leave the lights on no we actually drain your battery you know and the cables from the battery is pretty pathetic. Nancy they break in my house and let some of the parents of the cages so I come home and here's these clothes out cages and I've got animals running around the floor. You know I get put on surveillance cameras are they just break the cameras or come in the house and I had my daughter I was out of state 9 and some things that happened and I had to go back and look at the cameras and of course the deleted his entire like months of footage and you know with us in the camera medically when I went to one of the cameras 8. The girl in the bar. The US on more than one occasion and more than one a different girl does it approach in the bathroom in those people and tell them that they should stay away from me because of the violence and one person even told him that I was a child molester on an iPhone or anything you know but they're telling these lies slander your name how to get people to hate you so that way they're easier to manipulate it to if they want to use my hands you know they think they're actually doing a good thing for the community I would have conversations with people and everything was fine and then as soon as I was gone for a little bit go to the bathroom or whatever or go do something you know it wasn't uncommon that when I return to see them again or things like that yeah this is completely changed and that person wanted nothing to do with me any longer because those are the people that would talk to them about me one of the biggest schools will use family members against you too about what they'll do is if you talk about getting stuck in your survey on something they'll say like Hey we're we're you know we want to investigate this we know he's just you know delusion or demands it and you know the make up lies not trying to actually get your family members to be part of this come again soon the family members a lot of times loving care what you think you might be a little bit off because you're talking about these things and they're told to leave that there could be any bad cops are like weird people doing this and that's exactly was occurring. In order to get into in a second about this program because it's actually intended for one thing so even if you got a hold of some high level people said Hey I want to check this you know they're doing this and that to me then the council this line we are doing that we're using this program but it's because we have reports that he's been speaking to someone that has ties with high level gang members or you know a big drug dealer you know this only covers tracks. One of the biggest tools they use like my friends and how they use him as he was a confidential informant. Or the sheriff's department and that way those guys were already in place or any user balances already knew how to control buys it already knew how to all the other people are monitoring them while they were trying to extract information by drugs and do these different things. Easy for them because they already have the surveillance to surveil people for drugs and things like this the only difference is that is very secretive and quiet and you won't know this value whereas this is complete harassment and demonic and they want you to know that they're harassing you to psychologically get you to break down in harm yourself and commit suicide he said he only told me that I just he he told me that you know I'm worried

about you this and that and and these guys actually you know killed people had people you know these people kill themselves because it got so bad that they took their own lives and then these people who laughed and high fived and actually have a card in there is actually funding for these things when they get together for doing such a good job and so I mean there. You know so like well let me give them a second. The sheriff's department is courting coordinating almost every part of it it was supposed to be used to track psychotic people are kind of files or actual stalkers you know violent people violent gang members suspected terrorist members people that come over here let's say someone came over from Iran obviously they're going to surveil you know if they have ties to terrorist organizations and things and that's all the surveillance they don't harass. So do the same type of surveillance but it's just not the harassment psychological part to get those people to try and harm those people still watch them my friends your support would even use gas and high levels of their homes while the people were in the homes sleeping and that was the same type of things that you'll like hostage situations I remember there was a case where there was one guy that grabbed the key and barricaded himself like under the ground in this little thing and when you went to sleep thing gases answered it and then they. Actually killed him you know he reached for his gun but those are the type of taxes they can use they can employ gas and things to not only disorient would actually put you to sleep and then and while you're actually a sleepy and that would be an easy way is that a hard time towards a person's electronics are encrypted computer systems and things where they need physical access those were the issues some of those types of law enforcement tactics. And then when he was telling me about like going into people's houses when they're sleeping and things like that and some of these different things they were doing he got real nervous and he just looked at me and his eyes were kind of standing on set he said that you know he could be the one that is targeted for telling me to do this before you talk to me too we're out in the country and he right away pulled the the batteries out of our cell phones and we went to put them in the car and and you know he wouldn't talk about anything until that was done so we went out there and always you know a little nervous it's only in the sold me but he looked really sad when he told me that he could himself be targeted or hurt for talking about that when you start when entering the holes is when people are sleeping and things like that is your balance within targeted individual consisted of law enforcement using the law enforcement tools to track their cell phones and GPS tracked the vehicles they use being raised for the cell phones to intercept all the texts in different things in that set up a lot of times close to the individual or they would know what different people they talked him into giving payments and things set up right in that area but the scenery we could intercepts everything GPS tracked the car's phones all that stuff and then also he said. As anti virus and stuff that was a great way for them to track different people through different. Users are using and everything to keep on top of every single that that was going in and out to know who they're talking to in this mass of Sony met somebody online and they're having a great conversation and meet up and also talk to again you know a lot of times they intervene on behalf of. Person and this is this is a legal process that's the problem with the process that they're doing they're not doing legal parts other you know they're not supposed to but they're not supposed to actually like. Racing's of yours like kill children's. That animals like minor. My steering wheel things that document please. The. So basically everything you know there's some weird way of this different surveillance tools in the ways that they copiers your phone and stuff is there here's everything you see there thank you they will go out the main goal was to isolate the person and introduce other fake people into their lives their snitches. Take control of their lives and manipulate those people. And to destroy their finances and bring them

into a super depression. In certain ways and use different tactics they would hope that they would then commit suicide if someone turns in a copper police brutality or somebody sleep with the cops and white center then they can be targeted by this program illegally let's see they'll see it's legal because like I said the make up an excuse all that person's been very violent you know we're worried about him he's a psychotic episodes blah blah blah so they will put him in that category well come up with a lie like you know we believe in investing because we think he knows this high level drug dealer things like that. They'll get false witness is alive or dead individuals they can put them on the list to be harassed it's a funded program in is pretty very sick individuals some of the civilian stalkers are actually thinking they're doing a great service to the public community. Bring lessons of the research so if it happens okay I'm on this and I want to talk to you we think we have a possible child molester here rate so could we use your house the place camera will give you some money and things but we just you know this would be the best way to. Going on. This call stupid people are. Some of the civilians that occurs actually thinking they're doing service for the public community once they know all of your schedule the approach people in areas you most likely go in those people think they're helping out the sheriff's department by relating information about you back to them and and going along with the program so basically like I go to the gym we'll talk to people in general like all you know we think this guy has drugs the girl and tries to have sex with underage people and and you know or whatever they want they he's like a lot so then these people are making like minimum wages other more than happy to get a few Bucks the sheriff's department by going along with these lies the money going to the gym they make sure that there's at least one or 2 different people to constantly monitor you you know I'm going to the gym while you're at the gym when you leave the gym things like that also work with the isolation. The pharmacy told me that the funds they provide cast even gift cards so they cut a check you know in his case he uses drug addict and a lot of times these you know they give them actually like his buddies would give him drugs you know because they have full access to the whole shares of common things is pretty sick. You know that would be because they're best friends and you know this isn't legal it's not on the books you know but you know these things would be on the side you know and he also was able to sell drugs and they were worried about getting caught they mark these people's license plates to the cops and they go up behind running plays the older active investigations and you know doing something for the sheriff's department they will not they can get away with a lot of mostly like literally you know run into a person drunk or something but other than that they can get away with a lot of things. So. Thank goodness checked any of the civilian stalkers in the exact same way that the Peters performance to do controlled buys from drug dealers and the start of the surveillance in process to arrest them so you know when they're doing controlled buys in the setting of drug dealers and things are going surveillance on that person who is talking to where the drugs are coming from who is also a sweater what cars to drive all the same things from the server after the news locally AT and quietly to start the criminal case against them the only charges inside in the informant is involved in that whole process is the same thing and stalking is the exact same thing so they're doing interesting stuff. On purpose normal surveillance will be totally secretive and you never know all but this is the opposite this is like a logical worker that the police nearly no authorized it to get individuals to break down and harm themselves to the suicide as he told me they like to honk their horns as car alarms anywhere you go to make you think to make you know they're they're and place headlights that through a lot and things like that just let you know to try and pick a few things. I've actually had more than one city culture the trooper stick their arm out the window looked me right in the eye

will driving by and go like this you know just with the hatred on their faces put me on anything. Let's see they use other first responders and all the tools law enforcement to go against you. And you know the TARDIS prying the later ways they do this is with you know anybody could be an old lady this person that person with 5 global clients all part of a network. This is for her asking for the surveillance tools are the same as if they use it to watch any target at a high level surveillance part of it if they wanted to be real sneaky and like like so they're looking for is the watches but. Terrorists the union point these same type of thing but in the end and the different way than harassment surveillance and following you and using the tools and being able to monitor your phone saying right and all these different things would be somewhere they truly think it's funny and like I said to my friend told me warned me because he liked me a lot you know we're good friends and former and you know this is still you know about a month maybe a month point 5 before he died and. He like many know wasn't fair and he was doing the survey also himself because he started out doing it to go against like files and then there's now a lot of times people get started when they're close with the sheriff's department don't don't like Hey this is kind of files of my own personal going against asking member that we don't want our community and local law and that's when he started you know so is there with the right intentions within his heart and you know he's are realizing how bad it really was but anyway stalk is already involved and he want to become a third and so. So. Because most people like to say and then it started with him it led into you know going to anyone will be as the list that the group had a problem with it in life or someone made complaints against. Or whatever please. The program is legal as intentions earlier. But if you look for all their own demonic purposes or hatred for people the surveillance network wants to harass okay. Why. They could put them on the list my body has sent a confidential informant agreement with the sheriff's department is that and also they had grievance never talk about the program or anyone involved in it he was that roughly one month maybe maybe some of the most but I think it is a month month point 5 miles after you told me this and from then until now. This report after the kill my children's animal slice of my car's steering wheel nice vandalize vehicles vandalize my house break in my house I mean all kinds of things. Let's see you know like I said you know go to watch a movie with my dark more movie theater in the break in my car and slash of the steering wheel of knives and I come out of the car and even though I know what's going on and it's not even a big deal to me because I honestly how much okay I'll be honest with you I've never had a problem street fighting and I'm not tell people twice my size very easily most of the people involved in this they really are **** so like if you go to the gym and work out a little bit. On Tuesday you could not go 95 percent of these people very easily but the thing is they don't engage like that I'll tell you another tricky for me quickly too but let me go back to the spurs so I go to the movie theater I come all these lies during World nice and my daughter's car keys yeah you know so it wasn't fair to do that my daughter and this program was never intended for that these people away on the line and you know they feel that they're above the law because under this program they're actually allowed to break into people's cars to do certain things and they called the name of surveillance and stuff in there you know and they they're trying to be the person that was so helpful to the community and the needs of this type of surveillance in order just in case they can have but as long as you crap but anyways like I said I can stand toe to toe with any but the thing is is that if. I can stand toe to toe easily with any of these people but the thing is if I grab one on there actually taught taught if somebody gets violent with them they're taught to fall down and make sure the rubber arms on the ground you know all faces something to get scratches and then call the police act like this person's being psychotic in the short cuts and wounds to get higher

charges thrown down in the jail then they have to be allowed in the family things are crazy and then they can go work on the family like I said we'll psychologically I go to the families say Hey we're really worried about him is he hurt this person he's saying he didn't do it you know he thought more people surveilling him and stuff you know and that's all they come up with the lies and gets on the family to work against their own family members by doing this. One thing I forgot to mention also is that with their surveillance problem not only do they monitor your cell phone and turn that into a rolling blog anywhere you go over the month for your home also that's why when you talk about going somewhere the information is sent out for others who to already be there they they want to arrive before anything can but if they can they'll just come later all right and then I lost my cell phone number for the man I was really worried about this guy and so that's why I wrote that quick miss him but okay so we're gonna go over this again some of the notes on it Turner centrally working stalking is the origin of this is like I said is is by the sheriff's department coordinated by all the rules and forms and different civilian people and stuff that the employee for these tactics. They with with through all those years. Warning this link and follow you from the state to state they can just call and tell the guys he hears what we like to do like because. So that one of those council come on. This actually is easy is they don't need your keys they can call a lot numbers we. Global blood guidelines then he can. Copyright number given to the individual legal on the kind of vehicle only got the number and all these I mean if you get in your car and all these things. Rassie the informant they have workplaces place for them so that you know if they were pulled over other people's on the plate and all that their investigation working for the sheriff's department pulled over so they can literally you know do all kinds of illegal things I'll give an example my neighbor girl her name is amber and she says the owner vehicle smokes meth and drinks like all day long constantly and she doesnt by Israel from my house and things and she knows they won't do anything to see the sheriff's department others another got bill a few houses away same thing hill into my house when I leave and do different things and he has a right to do that through these people they work through the program so amber's sister actually took me off the one time and told me that amber had put a camera for 2004 hours of animals in my household. Money and so she's got a camera watching directly across. You know something like that so she has that she drives around the public all the time now is yours obviously she's not supposed to be able to sell narcotics and you know all these things but she does and you know obviously they don't care nobody's gonna care you know if your kind of a prostitute for the sheriff's department alleged commit crimes to get away with things one thing to remember about shares the firm's law enforcement different things there's a lot of good causes a lot of their. You know they're actually talking they're beating somebody don't say quit resisting into the videos you can see some of the times that is justified and many times it isn't no cameras you can record a lot of these things but the other thing too is I go to the gym a lot I'm 45 years old grandpa and I can still put up almost 400. With anybody but at the gym a lot of people you know you can always get through the house okay I know this personally and so if you want to 0 as you can get into the house and using steroids well this is the only thing all of the United States there was only so they're okay to commit a felony using the steroids you know you see all the doors open up in different areas and when you're justified under these surveillance programs and you think you're doing a great job through community even though using phony steroids but the bad guys are these guys so you're gonna do some techniques that are not only greater you don't write the illegal you know and that happens all the time so the people again over in these different people or by going to the gym you know there's just tons of people others got bills. The same thing those things and

he'll damage holes in vehicle things when I leave any threatening areas these people close to their home you know this guy likes to bad mouth me through different people within like religious activities at church and things like that Melissa Lindsay language. They get a few blocks and then turn forms and then they coordinate with these other people and it is just really a mixture of individuals that many of them are selling drugs and committing crimes themselves but they kind of have the goal okay not written anything but they're not gonna get arrested because one their license plates tomorrow. It won't pull over but who you know they're not supposed to be doing these things but obviously when they're doing all the work for them they're allowed to do these things don't get stuck on that yet so amber cross street his sister told me put a video camera to watch 24/7 so she. Is valuable to them because you can be around me all the time thanks to live here delights is ians and offer money to other people's homes in this it works with different ways like spectrum stuff to they can go talk to homeowners. Camera love love our community you know use your house times we're doing this operation and such and that's that's real common. Women in your house listening devices in the whole works they have every capability to be able to do these things if you have an iPhone 1 thing to remember is the easiest way is you know they they can actually there's like different viruses and things and buy stuff I can go on your own through the network what is their physical access is best but if you reset on iTunes especially from like a larger computer anything else that does clean your computer are clean the phone just is good is brand new and starts back up but all your phones are identified sample knows when you go online use or use different things use who owns the phone goes into a certain website or whatever that number is not only just like his rest of the Intel that this iCloud account belongs to this person you know is number 5369 problem you know well a lot there's always a digital signature to all these things. But the best way like I said reset do a full factory reset of your phone on iTunes and that'll make it totally clean for a short time installation across it again. Let's see you know build a neighbor guys gone into my house broke things in my garage door openings and stuff and he's another drug addicts most we can actually turn him in because he was taking advantage of elderly mentally written mostly on this morning stealing tools and forcing him to. He was forcing him the guys give him payments 6 his own house in the news trying to get the guy to give him that hello so I mean we were talking thousands of dollars don't you turn him in and right away he was the guy that was told that I'd done that so they put him on the list you know as informants in as one of these people to come against me. He loves doing this and you know he's got other things to. Thrown weapons and things and and eggs and and brought in my car and stuff like that. They work with different walking he shops also peacemakers for entry into all your homes that come combination type items it also use whatever they can get into easily and say it's just you know when you buy a combination of something they always put calls on the state so all the. All the same manufacturer given that cold and then right away the human the combination open the safe safe any longer the same with the like I said the if they want to get in your car rescue they can have a key cut right then number and then your house of people can come off the glass in your house whatever their full access to this the shares you know claiming for the legal use things and that's what it's intended for but is misused by these people that think they're vocal longer really simplistic and causing problems to many people you know what you figure you know let's say you have if you look up freemasonry police and freemasonry police badges and things on Google you'll see pictures of freemason police and they'll be like a master Mason from Chicago on the head of the maison board service a Luciferian doctrine they study the teachings of Albert pike and everybody I've always known they wanted me to be amazing all

of those guys read this weekend by a whole different Elser Crawley books and tons of stuff on Albert pike in magic witchcraft and all these different things so you got to remember some of these individuals that are in law enforcement they're probably freemason and then they also lose the care and docks and you see him rituals and me sonic lives and you can go to all this stuff and I can give you full documentation from their own books okay and and. Then on top of that the Jacksons sells out there or so they think that your slave their master. And that's why when the beatings get out of hand sometimes I I don't. Credit that you know please use the running after something they've grown tired and grab that person they might run him up a little bit and anybody can do that I have no problem with that but when you see videos of them torturing and beating keeping allowing their resellers to rip in the people's name on them on purpose and stuff that's that's a whole different category so the demonic active actions of these individuals that are doing certain things loose for not completing and rituals and part of a fellowship of the budget is and then they also go and Jack himself up on steroids their their emotions and different things are are out of control in the region that's when they hurt people so it is free yeah. Okay so. This. Okay so the. Since the the. Thank you so. All these occurred in number the locksmith friends without the keel are let's see so. The thing is like if you drive to another state they just call ahead and then another state does their dirty work for them and they're all you know bodies and sickness in this whole deal so I thought about going to the gym and many people it's all lies lies slander my name to meet people at the gym. Lately and have people trying to talk to me that much I think that if I do talk to them I'm trying to hit on young girls room trying to I might be possible rapists or you know on the phone or things which are total lies say whatever you know if they know about the individual they're gonna tell them things that relate to that person being turned off by having communication with somebody else that's on the list and being targeted for the surveillance. One of the. Tell you like you know the funny thing is is like you gotta remember these people you know that are going to be a psychological study over playing in a gradual. And can you can go to all this and see it on their own books. Reuters or violent groups please tell it is causing you to selling that that they were actually trained to say quit resisting while they are using somebody in brutalizing someone assaulting someone illegally and these people too that are falling around like is that if you go grab a question they're gonna do like on the NBA installed owns give their arms on the grounds that they can hopefully try and show some blood or something but they want to show more than just school he pushed me they don't want to disorderly conduct the one an assault with some damage so that you have to go to jail get bailed England families on the words that you're violence and watching you know and then they can work through that okay so everything's projected to have to cause as much chaos against you as they can. The like even even you know the cop the prosecuting attorney tells us what to say so when I go to court the prosecutor in museum tells them like a little profit what to say end up. For the best possible chance of winning the cases so even that's not true that's what they say and I'll give an example. If I punch myself in the face and was bleeding and wrote the blood over on your hand. One place on the league table throughout my book rather have my blood on it so on the grounds that help help he just assaulted me is trying to kill me. I'm sure you've got blood on your hands no he's full of crap and he won't run the blood on your bleeding. When you go to court and lose even though you were innocent you're gonna lose so prosecutors going to come in and say Hey you know I see them you know what kind of graphic guys sideways you know so the story changes quite a. A lot of people that will be used in different things from the masons and Freemasons Satanists and different things when I go to turn this thing turn into the wrong office actually freemason doing sitting in a crucial and Luciferian

doctrine in doing these things with a lot of higher level members obviously that person is going to be a blacklist and they're gonna trying doing absolutely nothing about this that they can I thought that it was a girl on a line that was a satanic ritual abuse and she was trying to get a story out there and they had started gaining stalking her and that's all the work you know so if you want to come again 7 things you know this these are things you have to deal with and like I said even if the highest man of the land trump decided to take a look at this right with somebody very high should the consummate cover their tracks and come up with informants that are going to lie and slander you and put you in a position where the cops. Are like Hey we listened to it we have a confidential informant. By the way since we've used many times and he said that this person is a violent game and he said that this person is a violent rapist he said this person might have ties to the terrorist network that's why we're investing in surveilling. Tracks. With the sheriff's department coordinating the systematic 24/7 surveillance blocking you from city to city and state and state already. On. It is really easy as phone number to another police department of computer networks and things so. Where they want. Other countries do the same thing also. The illegal things of the gang stalkers have done to me personally and we're supposed to be able to surveil you psychologically keeping confined in control but they're not supposed to do illegal things. Once was for using illegal narcotics and drugs and doing things themselves what they do. Taking into my home you know I've had a document coming home they let animals all running around my house. Things about those funny and and many different things like that lots of you know. Why do people say that I'm a felon slander me and totally completely lie even saying that as a child molester people. Waiting in my car slashing the steering wheel the amazing that he's slashing tires I think I've had. This is really going on for awhile now but I mean probably I think 5 or 6. At least is somewhere around that is at least 5 okay tires actually stabbed and slashed and like I said the vehicle the the breaking the vehicles because the steering wheel nice you know your parties cars somewhere not only do they drain the battery but they will actually drain the battery completely dies the battery terminals often pulling backwards you know that is not possible that we can better than that because obviously the battery cables. Off and then back up I've had razor blades in my shoes going to push you on Olsen field something pulled up overnight that razor blades my shoes that's happened 3 times I'll go ask my dryer somebody took a bunch of light poles and I got a load of clothes in the dryer and while I was gone they were in my house went into the dryer and the broken glass in line with my clothes and stuff and constantly breaking things of mine too you know within the house outside the house in my garage I would leave the garage in the middle I can drive into the garage things in the ground breaking phones either surveillance cameras they would break those cameras and the worst thing that's happened to me. Yes I was downtown and does a lot of times where I park in a parking ramp and I go around town and stuff like over in the parking ramp and you know if they know your movements and things are going to park in the program console and all the sudden of brick came off the parking ramp in it almost hit me in the head it would kill me it landed probably maybe 2 feet from my head full brick was thrown at me I had actually ran over that ramp in Iran up those stairs and I was going to destroy the person through the brick at my head I mean that's when I was actually targeted to be hurt bad or kill it nearly hit my head as well this far away so I ran up the. These guys I think they're ** and you know I go to the gym I work out I can street fight really well I follow Christ known I want you to know that that's another comfort to is a lot of people aren't going to and that's not your thing but I want you to know that there is something for me and it's comforting to because you can see the evil of these people that demonic activities that they're doing when you're into the**

scriptures and stuff because everything opposite of good you know they're really trying to systematically break you don't isolate you destroy your finances destroy you they don't give a ** about your children or anybody else okay they want you in the end in my body was messed with dead after telling this month point 5 later he told me to he said that was the ultimate goal and the thing is that they would actually have parties and he said you know one of them you went to when they celebrated but anyways he told me you know they would party can get together and everybody would high 5 in the deal happy that somebody has taken her own life in and they just you know stay on that list and same things according to the demonic activity within the hearts of the people that are within this program you know like I said sometimes I don't really think this is good but then they feel above the law in the evils in there doing very evil hateful wicked things against people to try and destroy them you know whether it be their minds as a social worker different ways of them so you know that's the sad thing about it and even those people who they know that they never want to be on the list so that's why you have a hard time having anybody come forward so I feel very blessed that my friend Josh it's only those things I miss dearly you know things easier mind getting involved with like maybe a church group or something even if that's not your thing. They will talk to the teachers and bad mouth you into all kinds of lies to get people in the church to to because of you but the thing is we can't get to everybody and if your own people and you're listening to some of the viral stuff like that is really good and if you really need to I would ask you to listen to an audio Bible over the New Testament and you'd be surprised and change your life and you can give me a little bit of comfort because you're going through hell in the tools are using our demonic and in a lot of these guys. Tools. And like I said all you have to do is Google freemasonry overpriced because they're big hero guy and his books and those. Practices and rituals it's a real I used to tell me a call that's going to these guys I was you know when I had problems before too I remember I do like Josh himself when we hang out a lot of stuff too but I was down in the calls and when I was asked to be amazing you know they were really excited when I didn't want to be but when we talk about these things before and and you know they were excellent blood rituals and different things with with him you know rabbits are different animals in the withdrawals and things and actually but this is the specifics of this in gang stalking is is the exact same type of thing they do the survey also many high level drug dealer terror suspect you know this and that or they surveil somebody that is this fact that the husband might kill the wife but they have to get proof of that and also managing the phone mails following constantly where they're going to be S. locations in translating everything using different algorithms to come against these people the same thing but this way they're using the exact same tools that are available through law enforcement in a perverted waiting for rescue to try to isolate you manipulate you and your movements and then ultimately it a lot of people commit suicide from this so it's a very sick sickening and a lot of individuals involved in our sick individuals themselves and even if they start out with the right intentions being around those that the circles they started becomes the clothes themselves so anyways I hope this is helpful if you have any questions is this video you know my heart was moved because like I said I watch the videos got it really bothered him so I left him a long message even my phone number to contact me because he's going through this so I hope you find some comfort in it'll fill in areas that he's been suspecting already and once you realize that it's a coordinated out for government funded and run by the sheriff's department and it's almost exactly as the same surveillance tools techniques sting rays. You know and different tools that they use to monitor follow people that are suspected of illegal activity they're using this us billions you know and these cops you just like. And romances. The exact same thing**

these guys actually signed agreements in this confidential informant agreements and things and they'll actually have you know know that Hey you can never talk. The other people involved or you could get on that list. So anyways I hope this is helpful to many of you and I didn't realize this was going to get this long it seems like every time I do a video he gets longer than intended but I'm you know a victim of the same thing right now in dealing with this myself he for me is because of my love for Jesus Christ also and I probably pretty can proclaim the gospel every my. And I love people and I identify vehicles. You can show people the satanic ritual. Some of these different things to do that these are my dogs in the house isn't quite so far but anyways I'm gonna get going to get a chance to my other videos on. You're not alone and I think we should start to grow so it. My dog is pushing the camera I think we should. Start a group. I think we should start a group really so other people don't feel isolated and alone because it's not there and like I said whatever perverted ways I think we can justify doing this there are certain ways to do things in the intentions of why that program even originated and now it's perverted and when they're going illegal Rollins and doing things that are easy legal against you this is a long course in actually doing that so that's not right and that has to stop but anyways you guys take care of all of the cameras that now but hopefully they can get off to myself.

FIN

THE END
